

Harald von Boehmer
1942 – 2018

Dear friends and colleagues,

It is with great sadness that we inform you of the passing of our beloved husband and father

Harald von Boehmer

30.11.1942 – 24.6.2018

He touched many lives, both as a scientist and as a person – many of you were inspired by his intelligence and quest for the truth, some were caught off guard by his directness. As one of his colleagues put it: 'I have so many happy memories of him giving me such a hard time at every opportunity (it was always a joy!) – he was so much fun in a challenging way, such a great scientist, with such a great mind'.

To honor his memory we cordially invite you to join us in celebrating his life on *September 8th, 2018* in Seefeld in Tirol, Austria. We invite those of you who knew Harald well to contribute to the celebration by sharing a memory during the memorial (an anecdote, pictures, ...). Please let us know by early August if you are able to join and if you would like to share a story.

To all of you who have reached out, our heartfelt thanks for your kind thoughts. It has touched us deeply to learn how loved and respected our husband/father was and what an impact he had on many of you.

Warm regards,

Monica, Philip and Nelli, Lisa, Lotta

In lieu of flowers, contributions may be made to the Association for the Advancement of Immunobiology (Verein zur Foerderung der Immunbiologie e.V.) | IBAN DE72 7015 0000 1003 3734 69 | BIC SSKMDEMM

The association was established in 2014 by Harald von Boehmer and Ludger Klein and is dedicated to the training of the next generation of scientists in immunology, an endeavor Harald was deeply committed to. The association is host of the conference series *Harald von Boehmer Midwinter Conference – Advances in Immunobiology* (midwinterconference.org), with the next conference taking place in January 2019.
